

T-1000

Allison AT1000/2000/2400
Output shaft nut Spanner Socket

Also fits GM NV4500
4X4 with dampener!

"WOW!" That may be your thought when you first take this out of the box.

Our T-1000 is milled from tough AISI 1018 steel.

Accepting a 1/2" drive and weighing in at just over 25oz, our socket is more than just another pretty face. The inner cavity is cut only slightly larger than the output shaft as to eliminate any possibility of side-loading the ears, shortening its service life, eventually slipping and rounding the uncommon spanner nut: a sure way to ruin your day.

T-1000 pictured with the spanner nut in the foreground

At Adapt-A-Case, we design and build our tools to last.
You'll be pleased with the quality and exact fitment guaranteed by our meticulous machining processes

Answering challenges with profitable solutions.
