Raybestos® Powertrain Receives 2017 GM Supplier Quality Excellence Award

Sullivan, IN (January 2, 2019) – The Raybestos Powertrain Sullivan, IN plant was awarded the GM Supplier Quality Excellence Award for their outstanding performance during the 2017 year. Quality Manager, Jerry Workman, travelled to Pontiac, MI on Dec. 11, 2018 to meet with Supplier Quality Engineer, Narendra Jagmohan, of GM and receive the award. Jagmohan appreciated Raybestos Powertrain's effort put into each shipment and congratulated the Sullivan plant on the accomplishment.

"Raybestos Powertrain made this possible by having good working relationships with GM, responding to concerns in a timely manner, and ensuring that employees understand their responsibilities of efficiently and effectively manufacturing parts," said Workman.

GM's stringent criteria for the Supplier Quality Excellence Award includes having zero customer complaints for 12 months and displaying quality performance of less than one defective part per million (PPM). Other metrics used for award eligibility requirements include being TS16949 certified and QSB or BIQS Level III or higher certified. GM uses an extensive OE supplier scoring system to track manufacturing analytics such as PR/R's, plant disruptions, and severity scores.

2017 marks the second year in a row that the Raybestos Powertrain Sullivan plant has received the award. It is the fifth consecutive year that one or more facilities within the Gearbox family has been honored to be recognized among this distinguished group of top performing OE suppliers.

"Raybestos Powertrain is pleased to have received the General Motors Supplier Quality Excellence Award for outstanding quality performance," says Director of Operations, Dean Decker.

About Raybestos Powertrain

Raybestos Powertrain is a brand of Gearbox Holdings and is a manufacturer and supplier of premium OE and aftermarket automatic transmission parts, providing innovative solutions to domestic and international customers. Located in Sullivan and Crawfordsville, Indiana, Raybestos Powertrain is proud to supply made-in-the-USA parts to the automatic transmission industry. With nearly two-thirds of Raybestos Powertrain's yearly revenue coming from OE and service business, the company uses its knowledge of manufacturing OE automatic transmission parts to provide innovative solutions to transmission rebuilders in the aftermarket.
