

# IMPORTANT PRODUCT UPDATE

Announcement Number: S02282501

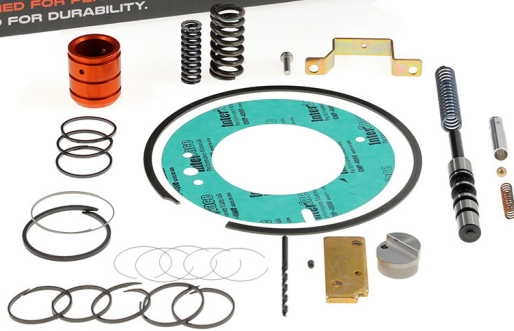

## UPGRADED AND UPDATED 62TE High Pressure Tuneless™ Valve Body Reprogramming™ Kit

Fits 62TE 2007-on

**OLD PART NUMBER:** 62TE-HP  
**NEW PART NUMBER:** 62TE-HP-A (UPGRADED)

TransGo has permanently upgraded our highly popular High-Pressure Tuneless™ Valve Body Reprogramming Kit™, incorporating valuable feedback from technicians in the field to deliver even greater performance and durability.

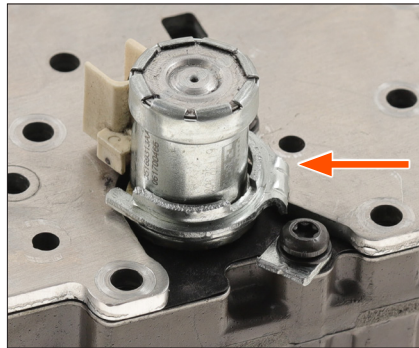

*An essential durability upgrade for hard-working ProMaster and passenger vans, especially in shift-busy delivery vehicles.*

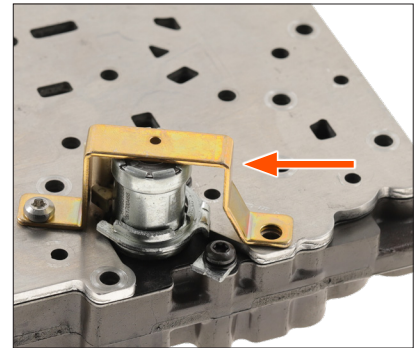

### Upgrades and updates

#### Includes heavy-duty TCC solenoid retaining bracket and hardware

Reinforces the weak factory mounting tab (known for breaking in stock applications) causing various issues of delayed or no move forward, TCC slip, limp mode, vent leaking, low pressure codes and burnt UD clutches.

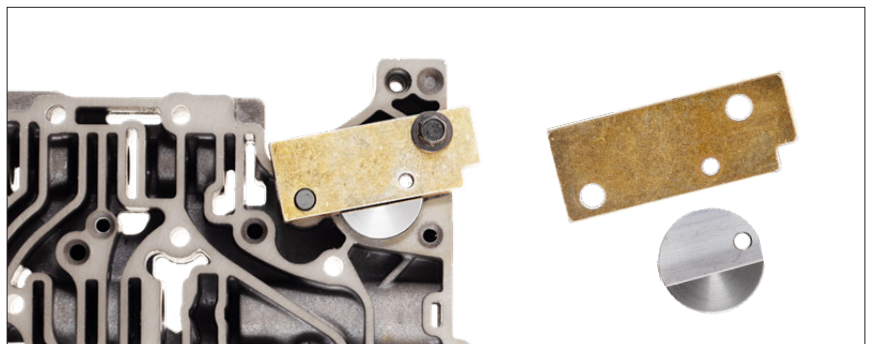

Factory bracket commonly broken

TransGo HD retaining bracket

#### Improved 2-piece drill guide for greater accuracy when drilling by hand

The new jig with full length piloting guide helps to ensure accurate vertical drilling, especially when using hand drills.

**ENGINEERED FOR PERFORMANCE.  
DESIGNED FOR DURABILITY.**
